The question is between the required payment and so much additional taxation. It is true, that the Stockholder draws no dividends from these works—as investments of money, they have been so far unfortunate, but many of them have derived benefit from the improvement of their trade and property, and the portions of the country using them as commercial highways have been greatly benefited. It is enough that the State loses its enormous subscriptions as a stockholder. It cannot be just that the citizens of the Commonwealth at large should be taxed in a period of such general distrees, for default of the payment of the interest on sums loaned to those improvement, should at least bear the charge of the improvement, should at least bear the charge of the interest on sums loaned to those improvement, should at least bear the charge of the interest of sums death of a genuine Christian.
